CLiC-IT[®] PRO 60

P.P.E. for continuous protection

Revolution

"CLiC-iT provides the answer to a pitfall we have identified on the ground, when workers can find themselves with both the carabiners unhooked."*

- "Even as a professional, one can be distracted by something which entails a momentary lack of attention.*"
- "As the tests went on, we saw that we would climb faster, allowing us to feel more comfortable and fully focused on our task.*"
- "As managers, we have to make sure our workers are safe and that we comply with general safety rules.*"

Peace of mind

CLiC-iT prevents accidental unhooking and offers continuous protection throughout the progression.

CLiC-iT PRO 60:

- Compatible with all types of safety cables and anchors (scaffolding, pylons, ladders...) for a vertical or horizontal progression.
- Allows a safer and quicker progression. The handle of the CLiC-iT Pro 60 becomes the natural extension of the hand, like an ice axe, and the guard protects the hand of the user.
- Ensures total freedom of movement and action.

Confidence

With 9 years of experience and over 10 million users in the leisure sector, CLiC-iT provides the reassurance of tried, tested and approved technology.

CLiC-iT PRO 60 relies on :

- A mechanical system that is simple, ingenious and sturdy
- A two-year warranty
- Lifetime of 10 years for regular use
- A compliance with standards EN354 (lanyards), EN355 (energy absorber), EN358 (retaining lanyard) and EN362 (connectors)

CLiC-iT[®] PRO 60
